## AUSBILDUNG

**August 2020-Oktober 2021** : Ners in der Klabat Universität, Stadt Manado/ GPA: 3, 88

**August 2016- Mai 2020** : Bachelor of Nursing in Pflegewissenschaft Klabat Universität, Stadt Manado / GPA: 3,96  
Ehren : Summa cum laude

**Juni 2013-Mai 2016** : Mebali Adventische Oberschule, Toraja

**Juni 2010- Mai 2013** : Mebali Adventische Mittelschule, Toraja

**Juni 2004-Mai 2010** : Staat 8 Rindingallo Grundschule

## RELEVANTE ERFAHRUNGEN

**2019-2021** : Bei Zentrales Stadtliche Krankenhaus Prof. Dr. Rd Kandou Manado Klinisches Praktikum in übertragbaren Krankheiten, Mutterschaft, Pädiatrie, Wahrnehmung und Sinneswahrnehmung des Auges, Notfallpflege, Hämodyalise, Intensivpflege, perioperative Pflege

**August – November 2018** : Bei Krankenhaus der Siebenten-Tags-Adventisten, Manado Klinisches Praktikum in der medizinischen Chirurgie Practice Medical Surgical Nursing at Adventist Hospital Manado Praktikum bei Familien- Und Gemeindekrankepflege in Desa Batu Putih

**September-Januar 2019** : Als Fachkrankenschwester

## ZERTIFIZIERUNGEN

- Mai 2021  
Basic Trauma Cardiac Life Support (BTCLS) – Manado
- November 2020  
Internationale Pflegekonferenz, Gesundheitswissenschaften und Technologie – Manado
- Oktober 2019  
Notfallversorgung bei orthopädischen Verletzungen – Manado
- Oktober 2018  
Qualitätsverbesserung in der psychiatrischen Pflege durch Pflegequalität – Manado

## FÄHIGKEITEN

- Vitalparameterbewertung
- Therapeutische Kommunikation
- Erstellung des Pflegeplanes  
Ganzheitliche Betreuung  
Infektionskontrolle
- Verabreichung von  
Medikamenten in der Intensiv- und Notfallversorgung
- Lebenserhaltung
- Atemwegspflege
- Probleme lösen
- Allgemeine Wundversorgung
- Körperpflege
- Dokumentation
- Verbände anlegen und wechseln
- Prophylaxen durchführen

No	Code	Subject	Credit	Description
----	------	---------	--------	-------------

**Prerequisite**

1	FENG000	Bahasa Inggris Dasar/ Foundation of English	3 x 50 minutes/week x 16 meetings	This course is an intensive and remedial English Course intended for new students who did not pass the entrance test. The course provides the students with basic English vocabulary, grammar and conversation as to assist the students to attain the threshold level of English as needed to function in the university.
2	ASKN120	Keterampilan Mengetik I/ Keyboarding I	3 x 50 minutes/week x 16 meetings	After completing in this course, students are expected to be able to use a typewriter keyboard with ten fingers without seeing letters / number keys, skilled in making tables, letters, complex list of numbers, and able to reach speeds of 30 words per minute.

**Semester 1**

1	AGMA181	Hidup dan Ajaran Yesus I/ Life and Teaching of Jesus I	2 x 50 minutes/week x 16 meetings	This course learns about the teachings of Jesus Christ, His existence as a human being, His death, His resurrection to heaven and His existence in heaven. The whole lesson include plans for salvation for mankind. Forms of learning include lectures, and group discussions.
2	BINA106	Bahasa Indonesia/ Indonesian Language	2 x 50 minutes/week x 16 meetings	This course studies about Indonesian in nursing by emphasizing the use of structure and grammar, the way to communicate in daily nursing care both in the learning process and in the clinic, the use of good and correct Indonesian through computers in the form of academic writing, and reading references related to nursing that provides a foundation for ethical concepts in language. Forms of learning experience include lectures and group discussions.
3	INGU121	Bahasa Inggris I/ General English I	3 x 50 minutes/week x 16 meetings	This course covers grammar, composition, and writing in English. This course also include English conversation and is equipped with medical terminology, nursing terminology, and other information related to activities and communication in nursing services in the hospital environment and other health fields. Forms of learning experience include lectures and group discussions.
4	FUND111	Psikologi Keperawatan/ Nursing Psychology	2 x 50 minutes/week x 16 meetings	This course studies the human personality according to growth and its influence on the environment and relations between humans. This course also focuses on the growth and development of mind / personality, sensations from perception, cognitive, and memory and feelings of human. Furthermore, this course also emphasize on the use of the principles of general psychology and human relations. Forms of learning experience include lectures and group discussions.

5	BION111	Ilmu Biologi/ Biological Science	2 x 50 minutes/week x 16 meetings	This course focuses on the understanding of science, especially biology, the characteristics of life from simple life (one cell organisms and cell as the smallest unit of life) to complex life (organs and systems in the body, both functions and forms). Further discusses the development of ontogenic organisms, then the classification and nomenclature of organisms. This subject also emphasizes further understanding of ecology (the living space of organisms, their interactions with the environment and with other organisms, food chains, and evolution. Moreover, it discusses about genetics and reproduction which will provide
6	BION112	Fisika Keperawatan/ Physics in Nursing	1 x 50 minutes/week x 16 meetings	Focuses on the basic principles of physical symptoms. students will learn the main laws of mechanics, thermodynamics, wave energy, electricity, and nuclear physics. It emphasizes on the understanding of the laws of physics in the human body, the use of physical energy with clinical instruments. forms of learning experience include lectures and discussions.
7	BION113	Kimia Dasar/ Basic Chemistry	2 x 50 minutes/week x 16 meetings	Focuses on material structure, periodic properties of elements, electronic structures of compounds, gas phases, stoichiometry, solutions and organic chemistry. Forms of learning experience include lectures, group discussions and laboratory.
8	BION115	Anatomi dan Fisiologi I/ Anatomy and Physiology I	3 x 50 minutes/week x 16 meetings	Focuses on the principle of the functioning of the human body, including cell structure and function, respiratory system, cardiovascular system, digestive system, integumentary system, genitourinary system, and skeletal system. Emphasizes on the physiological mechanisms of cells and organs, as well as the interaction of various organs in maintaining their functions. Forms of learning experience include lectures, group discussions and laboratory.
9	FUND112	Keperawatan Dasar I/ Fundamentals of Nursing I	3 x 50 minutes/week x 16 meetings	Focuses on the nursing process as the core process for nursing practice and basic human needs including maintenance, fulfillment, and integrity as the scope of nursing. emphasis on applying nursing processes in meeting the physiological and psychological needs of patients. Emphasis on applying nursing processes in meeting the physiological and psychological needs of patients. Students will also get the opportunity to learn the basic skills of the nursing process, and protective actions related to nursing practice. Forms of learning experience are given through the application of nursing processes to both nursing laboratories and practice fields for certain models using basic concepts and principles of nursing care.

## Semester 2

1	AGMK182	Hidup dan Ajaran Yesus II/ Life and Teaching of Jesus II	2 x 50 minutes/week x 16 meetings	This course learns about the teachings of Jesus Christ, His existence as a human being, His death, His resurrection to heaven and His existence in heaven. The whole lesson include plans for salvation for mankind. Forms of learning include lectures, and group discussions.
2	INPE122	Bahasa Inggris II/ General English II	3 x 50 minutes/week x 16 meetings	This course covers grammar, composition, and writing in English. This course also include English conversation and is equipped with medical terminology, nursing terminology, and other information related to activities and communication in nursing services in the hospital environment and other health fields. Forms of learning experience include lectures and group discussions.

3	PEND131	Filsafat Pendidikan Kristen/ Philosophy of Christian Education	2 x 50 minutes/week x 16 meetings	This course learn about the concepts, systems, and principles that are correct in implementing Christian Education programs including leadership, administration and managerial responsibilities in line with divine instructions. Forms of learning experience include lectures and group discussion.
4	FUND123	Etika dan Hukum Keperawatan/ Nursing Ethics and Law	2 x 50 minutes/week x 16 meetings	The focus of this course is to provide knowledge to students about nursing as a profession, the criteria of a profession, and the qualifications and abilities of a professional nurse. This course also teaches about the various fields of nursing and how the relationship between nurses and the community, nurses with their practice, nurses and peers, nurses and their profession, as well as nurses' responsibilities to patients, patient responsibilities and nurse rights, responsibilities nurses to doctors and nurses' responsibilities to themselves morally and spiritually. Also not to miss this course is to study the procedures for applications to obtain SIP, SIK, and SIPP. Forms of learning experience include lectures and discussions
5	BION124	Biokimia/ Biochemistry	2 x 50 minutes/week x 16 meetings	Focuses on organic and biological chemistry, where students will learn about the basic principles of organizing organic functional groups, biological structures and essential reactions to human life. Emphasis is on understanding the chemical processes in the body that convert food substances into biological energy, how these chemicals are used to maintain normal cell structure and function and how
6	BION126	Anatomi dan Fisiologi II/ Anatomy and Physiology II	3 x 50 minutes/week x 16 meetings	Focus on the principle of the functioning of the human body, including the innervation system, endocrine system, sensory system (smell, taste, vision, hearing, and equilibrium), muscles and joints, reproductive system, acid-base homeostasis, and fluid and electrolytes. Emphasis on the physiological mechanisms of cells and organs, as well as the interaction of various organs in maintaining their functions. Forms of learning experience include lectures, group discussions, and practicums.
7	FUND124	Keperawatan Dasar II/ Fundamentals of Nursing II	3 x 50 minutes/week x 16 meetings	The focus of this course is to explain the concepts of health-sickness, nursing history of Indonesia and the world, the pioneers of nursing theory along with its theory, the concept of stress and adaptation and nursing documentation. The form of learning experience includes lectures, discussions, and laboratory
8	FUND125	Praktik Keperawatan Dasar I/ Fundamentals of Nursing Practice I	3 x 170 minutes/week x 16 meetings	This subject is given to students to be able to express and apply theoretical principles and clinical skills in a clinical context. This course focuses on nursing care ranging from nursing studies to nursing evaluations, using health patterns and clinical skills that have been studied and practiced in the laboratory. The learning process includes lectures, discussions, practicums and problem solving.

### Semester 3

1	AGMK283	Prinsip-Prinsip Alkitab I/ Biblical Principles I	2 x 50 minutes/week x 16 meetings	These two subjects discuss biblical doctrines as believed by the Seventh-day Adventist Church. Among them concerning Godliness, the origin of sin, human salvation, the role of the church, the history of God's people and the life of heaven. The form of learning experience includes lectures and group discussions.
---	---------	--	--------------------------------------	--

2	INPE223	Bahasa Inggris Keperawatan I/ General English III for Nurse	3 x 50 minutes/week x 16 meetings	This course covers grammar, composition, and writing in English. This course also include English conversation and is equipped with medical terminology, nursing terminology, and other information related to activities and communication in nursing services in the hospital environment and other health fields. Forms of learning experience include lectures and group discussions.
3	COMP211	Komputer Keperawatan/ Computer in Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is that students know and practice how to use computers for writing letters, essays or nursing research through word microscopy and also students will know how to use power points to present something. forms of learning experience include lectures, discussions and practicums.
4	BION217	Mikrobiologi dan Parasitologi/ Microbiology and Parasitology	3 x 50 minutes/week x 16 meetings	Focus on the principles of general biology of microorganisms, various disease-causing organisms and the role of the general system for microbial diseases. This subject also discusses the life cycle of parasites and caused diseases, prevention and epidemiology. Forms of learning experience include lectures, group discussions, and laboratory experience.
5	FARN211	Farmakologi Keperawatan/ Pharmacology in Nursing	2 x 50 minutes/week x 16 meetings	Focus on basic pharmacological knowledge and medicines that are commonly used as a foundation for further study and application in all clinical fields. The form of learning experience includes lectures and discussions.
6	FARN212	Perhitungan Obat dan Larutan/ Drugs and Solutions Calculation	2 x 50 minutes/week x 16 meetings	Focus on basic ways to calculate medicines to be given to patients. The form of learning experience includes lectures and discussions.
7	MSNG211	Keperawatan Kardiovaskular/ Cardiovascular Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on meeting the needs of adult clients with disruption to meeting circulation needs. The provision of nursing care in cases of cardiovascular disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, nutrition, surgery and rehabilitation. The system disorders include disorders of inflammation, degenerative disorders, malignancy and trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices

8	MSNG212	Keperawatan Gastrointestinal/ Gastrointestinal Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on meeting the needs of adult clients with digestive system disorders. The provision of nursing care in cases of digestive disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, nutrition, surgery and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, malignancy and trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.
9	MSNG213	Keperawatan Respirasi/ Respiratory Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients with disruption to meeting oxygenation needs. The provision of nursing care in cases of respiratory disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, nutrition, surgery and rehabilitation. The system disorders include disorders of inflammation, degenerative disorders, malignancy and trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.
10	FUND216	Praktik Keperawatan Dasar II/ Fundamentals of Nursing Practice II	3 x 50 minutes/week x 16 meetings	This subject is given to students to be able to express and apply theoretical principles and clinical skills in a clinical context. This course focuses on nursing care from nursing studies to nursing evaluations, using health patterns and clinical skills that have been studied and directly practiced to clients in hospitals and / or other health agents. The learning process includes clinical learning experiences, field learning experiences, and problem solving.

#### Semester 4

1	AGMK284	Prinsip-Prinsip Alkitab II/ Biblical Principles II	2 x 50 minutes/week x 16 meetings	These two subjects discuss biblical doctrines as believed by the Seventh-day Adventist Church. Among them concerning Godliness, the origin of sin, human salvation, the role of the church, the history of God's people and the life of heaven. The form of learning experience includes lectures and group discussions.
2	INPE224	Bahasa Inggris Keperawatan II/ General English IV for Nurse	3 x 50 minutes/week x 16 meetings	This course covers grammar, composition, and writing in English. This course also include English conversation and is equipped with medical terminology, nursing terminology, and other information related to activities and communication in nursing services in the hospital environment and other health fields. Forms of learning experience include lectures and group discussions.

3	BION228	Nutrisi dan Terapi Diet/ Nutrition and Diet Therapy	2 x 50 minutes/week x 16 meetings	Focus on the relationship of nutrition and body health at various levels of human recycling; the influence of socio-economic and socio-cultural factors on the adequacy of nutrients; and modification of normal diets for therapeutic purposes. Forms of learning experience include, lectures, laboratory and field experience.
4	BION229	Patofisiologi/ Pathophysiology	2 x 50 minutes/week x 16 meetings	Focus on understanding changes in cell / tissue structure in various diseases / disorders that are often encountered. With the understanding that changes at the cellular level are the basis for the emergence of pathological abnormalities in tissues, organs, laboratory abnormalities and symptoms of the disease, which is the rationale for treatment treatment and determines the prognosis. The forms of learning experience include lectures, discussions, and selective laboratory activities.
5	STAN221	Biostatistik/ Biostatistics	3 x 50 minutes/week x 16 meetings	Focus on statistical principles, level of measurement, graph presentation of descriptive measures of central tendencies, dispersions and associations, inferential statistics, hypothesis tests and applications in interpreting the nursing research literature. The form of learning experience includes lectures and discussions.
6	MSNG224	Keperawatan Persyarafan/ Neurologic Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on fulfilling the needs of adult clients with nervous system disorders. The provision of nursing care in cases of neural system disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices
7	MSNG225	Keperawatan Endokrin/ Endocrine Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on meeting the needs of adult clients with disorders of the endocrine system. The provision of nursing care in cases of endocrine disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, nutrition, surgery and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, malignancy and trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.

8	MSNG226	Keperawatan Muskuloskeletal/ Musculoskeletal Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on meeting the needs of adult clients with disorders of the musculoskeletal system. The provision of nursing care in cases of musculoskeletal system disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including
9	FUND227	Praktik Keperawatan Dasar III/ Fundamentals of Nursing Practice III	2 x 50 minutes/week x 16 meetings	This subject provides students with understanding and mastery of the basic concepts of nursing which are the basis for providing effective and safe nursing care for individuals, groups and communities who have physical, mental or social problems in various health service settings

### Semester 5

1	AGMK385	Nubuatan Alkitab I/ Biblical Prophecies I	2 x 50 minutes/week x 16 meetings	This course specifically discusses prophecy or historical predictions, events that occur now to the end of the world, both in terms of social, religious, and political as written by the apostle John, one of the disciples of Jesus in the book of Revelation in the New Testament. The form of learning experience includes lectures and group discussions.
2	MATN311	Keperawatan Maternitas/ Maternity Nursing	3 x 50 minutes/week x 16 meetings	This course focuses on understanding the concepts and theories of maternity nursing and government policies in improving the health of women of childbearing age, pregnant women, mothers of birth, and their babies up to the age of 40 days in normal conditions and their families. As well as care for various health problems and complications related to the female reproductive system and the influencing factors, as well as nursing care for newborns at risk. The form of learning experiences through lectures, discussions and laboratory practices.
3	PEDN311	Keperawatan Anak/ Pediatrics Nursing	3 x 50 minutes/week x 16 meetings	Pediatrics nursing is the basis in providing effective and safe nursing care in accordance with the level of growth and health. Focus on the basic concepts of pediatrics nursing, theory, principles and models of pediatrics nursing practice, child development, child nursing care that experiences health leverage, government policy. This course also introduces the Manajemen Terpadu Balita Sakit (MTBS) and social pediatric with a critical approach to each disease and child nursing process in the family context. The form of learning experience include lectures, discussions and laboratory.

4	MSNG317	Keperawatan Persepsi dan Sensori/ Perception and Sensory Nursing	2 x 50 minutes/week x 16 meetings	The focus of this subject is on meeting the needs of adult clients with impaired sensory perception systems. The provision of nursing care in cases of sensory perception system disorders is based on the nursing process by applying biomedical sciences such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices
5	MSNG318	Keperawatan Penyakit Menular/ Communicable Diseases Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients in the presence of infectious diseases. The provision of nursing care in cases of infectious diseases is based on the nursing process by applying biomedical science such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.
6	HPEN311	Promosi dan Pendidikan Kesehatan/ Health Promotion and Education	2 x 50 minutes/week x 16 meetings	This subject focuses on the basic concepts of health education in promotive, preventive, curative, and rehabilitative aspects related to human nature as beings who can / need to be educated to be able to change behavior. The principle of learning is done in class and in community institutions.
7	CLIN311	Praktik Klinis Keperawatan I/ Nursing Clinical Practice I	6 x 170 minutes/week x 16 meetings	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care of adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disturbances in various body systems. Focuses on respiratory, cardiovascular, digestive, musculoskeletal, endocrine and nerve disorders. The learning process includes clinical learning experience, field learning experience, and problem solving

#### Semester 6

1	AGMK386	Nubuatan Alkitab II/ Biblical Prophecies II	2 x 50 minutes/week x 16 meetings	This course specifically discusses prophecy or historical predictions, events that occur now to the end of the world, both in terms of social, religious, and political as written by the apostle John, one of the disciples of Jesus in the book of Revelation in the New Testament. The form of learning experience includes lectures and group discussions.
---	---------	---	--------------------------------------	--

2	MGTN321	Kepemimpinan dan Manajemen Keperawatan/ Leadership and Management in Nursing	3 x 50 minutes/week x 16 meetings	This subject studies how to manage a group of nurses using management functions so that they can provide nursing care to clients, discuss management theories and leadership to provide professional nursing services. This course emphasis includes the use of management and leadership skills in an effort to provide overall service to clients in the context of nursing service management and in initiating effective change in the nursing care system. The form of learning experience includes lectures, discussions, and field practice, seminars are used to synthesize concepts from the subject matter.
3	STAN322	Metodologi Riset Keperawatan/ Research Methodology in Nursing	3 x 50 minutes/week x 16 meetings	The focus of this course is an understanding of the fundamentals of research theory, elements of research processes, ethical aspects in research, making proposals and research processes until reporting and disseminating the results of research. Learning activities include lectures, discussions, discussion of research and making scientific work proposals.
4	ADV321	Keperawatan Perioperatif/ Perioperative Nursing	1 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients with the perioperative nursing process. The provision of nursing care in cases of infectious diseases is based on the nursing process by applying biomedical science such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.
5	ADV322	Keperawatan Intensif/ Intensive Care Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients with intensive nursing processes. The provision of nursing care in cases of infectious diseases is based on the nursing process by applying biomedical science such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.

6	ADV323	Keperawatan Hemodialisa dan Genitourinari/ Hemodialisis and Genitourinary Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients with the genitourinary system and hemodialysis. The provision of nursing care in cases of infectious diseases is based on the nursing process by applying biomedical science such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary
7	ADV324	Keperawatan Gawat Darurat/ Emergency Nursing	2 x 50 minutes/week x 16 meetings	The focus of this course is on meeting the needs of adult clients with emergency nursing. The provision of nursing care in cases of infectious diseases is based on the nursing process by applying biomedical science such as biology, histology, biochemistry, anatomy, physiology, pathophysiology, medical surgical nursing, internal medicine, pharmacology, surgery, nutrition and rehabilitation. Disorders of the system include disorders of inflammation, degenerative disorders, trauma, which are included in the 10 biggest cases both locally, regionally, nationally and internationally. The scope of the discussion starts from the assessment up to the evaluation of care for the client. Nursing interventions include therapy for nursing modalities in various conditions including complementary therapy. The learning process is done through expert lectures, collaborative learning (CL) and Problem Based Learning (BDM), and laboratory practices.
8	CLIN322	Praktik Klinis Keperawatan II/ Nursing Clinical Practice II	6 x 170 minutes x 16 meetings	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on disorders of pediatric system, maternity, infectious diseases, and sensory perceptions. The learning poses include clinical learning experience, field study experience and problem solving

#### Semester 7

1	PSYN411	Keperawatan Jiwa/ Psychiatric Nursing	3 x 50 minutes/week x 16 meetings	This course focuses on the discussion of nursing efforts in primary, secondary and tertiary prevention of clients with biopsychosociospiritual problems and mental health disorders. Individual therapeutic relationships in family context, therapy of nursing modalities, issues of trends in health / psychiatric nursing in Indonesia and the role of nurses in overcoming health problems. Learning experience include lectures, discussion and laboratory.
2	GERN411	Keperawatan Gerontik/ Gerontologic Nursing	2 x 50 minutes/week x 16 meetings	This course focuses on the discussion of basic geriatric concepts, biopsiko-sociocultural-spiritual theory in the aging process, nutritional needs, rest / sleep, sexuality in the elderly, problems that occur in the elderly and its application to nursing care in meeting every need. . This branch of science will also prepare nurses in carrying out nursing services / care to the community. Learning experience includes lectures, discussions, case discussions, and the application of field learning

3	FAMN411	Keperawatan Keluarga/ Family Nursing	2 x 50 minutes/week x 16 meetings	The focus of this family nursing practice is to provide an understanding of family nursing care at each stage of family development and family problems related to health problems prevalent in Indonesia, issues and trends in family nursing with an emphasis on efforts to improve health, prevent disease and maintain health.
4	COMN411	Keperawatan Komunitas/ Community Nursing	3 x 50 minutes/week x 16 meetings	This subject discusses the basic concepts of health and community nursing, health programs / government policies in addressing community health care priority issues and discussions related to issues and trends in community health problems in the context of major health services with an emphasis on improving health , disease prevention, and health care.
5	NRSG411	Skripsi I/ Baby Thesis I	3 x 50 minutes/week x 16 meetings	This course is intended for students to complete thesis writing from chapter I to chapter III, and the proposal defense. Learning activities include discussion, thesis writing process and thesis proposal defense.
6	CLIN413	Praktik Klinis Keperawatan III/ Nursing Clinical Practice III	6 x 170 minutes x 16 meetings	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on OR, ER, ICU, HDRGU, and management. The learning poses include clinical learning experience, field study experience and problem solving.

#### Semester 8

1	PPKN301	Pendidikan Kewarganegaraan/ Indonesian Civics	3 x 50 minutes/week x 16 meetings	This subject discusses the insights of the archipelago, national defense and security awareness and the defense and security strategy. Focusing on understanding the archipelago's insight which includes ideological, political, economic, socio-cultural, and defense and national security aspects to be applied in the profession of nursing profession. Forms of learning experience include lectures, and group discussions.
2	NRSG422	Skripsi II/ Baby Thesis II	3 x 50 minutes/week x 16 meetings	This course is focused so that students can continue and complete thesis writing chapter IV through chapter V and oral defense. Learning activities include discussion, the process of writing the completion of a thesis and oral defense.
3	CLIN424	Praktik Klinis Keperawatan IV/ Nursing Clinical Practice IV	3 x 50 minutes/week x 16 meetings	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on geriatric, psychology, community and family nursing. The learning poses include clinical learning experience, field study experience and problem solving

NO	CODE	SUBJECT	CREDIT	COMPLETE D HOURS	PRACTICE FIELD	DESCRIPTION
<b>SEMESTER 5</b>						
1	CLIN311	Nursing Clinical Practice I	6	272	East Indonesia Adventist Medical Center	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care of adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disturbances in various body systems. Focuses on respiratory, cardiovascular, digestive, musculoskeletal, endocrine and nerve disorders. The learning process includes clinical learning experience, field learning experience, and problem solving.
<b>SEMESTER 6</b>						
1	CLIN322	Nursing Clinical Practice 2	6	272	RSUP Prof Dr. R.D. Kandou Manado	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on disorders of pediatric system, maternity, infectious diseases, and sensory perceptions. The learning poses include clinical learning experience, field study experience and problem solving.
<b>SEMESTER 7</b>						
1	CLIN413	Nursing Clinical Practice 3	6	272	RSUP Prof Dr. R.D. Kandou Manado	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on OR, ER, ICU, HDRGU, and management. The learning poses include clinical learning experience, field study experience and problem solving.
<b>SEMESTER 8</b>						
1	CLIN424	Nursing Clinical Practice 4	3	136	Panti Werda Senja Cerah Paniki, Community	Synthesis of adult nursing concepts and principles through the application of nursing science and technology into nursing care for adult clients who experience physiological changes or tend to experience physiological changes accompanied by structural disorders in various body systems. Focuses on geriatric, psychology, community and family nursing. The learning poses include clinical learning experience, field study experience and problem solving.

### KURIKULUM PROGRAM STUDI PROFESI NERS FAKULTAS KEPERAWATAN UNIVERSITAS KLABAT

Semester	No.	Kode (Code)	Mata Kuliah (Subject)	SKS (credits)	Bobot/SKS (content /credits)	Pertemuan /Semester (Meeting /Semester)	Total/jam (Total/hour)	Lahan Praktik (Practice Location)	Keterangan (description)
SEMESTER 1	1	FUND501	Keperawatan Dasar Profesi / Basic Nursing Profession	3	170 menit	16	136	Laboratorium Keperawatan Universitas Klabat (Universitas Klabat Nursing Laboratory)	Mata ajar Keperawatan Dasar Profesi merupakan mata ajar praktik di Program Profesi Ners yang berfokus untuk mengasah kemampuan mahasiswa agar mampu bersikap dan bertindak sebagai perawat professional. Kemampuan mahasiswa ini meliputi melakukan analisis gangguan kebutuhan dasar klien dan keluarga, bersikap <i>caring</i> dalam pemberian asuhan keperawatan, membina hubungan interpersonal kepada klien dan keluarga, serta dapat memberikan asuhan keperawatan secara tepat kepada klien dan keluarga yang mengalami gangguan pemenuhan kebutuhan dasar. ( <i>Basic Nursing is a practical course in the Nursing Profession Program that focuses on honing students' abilities to be able and act as professional nurses. This student's ability includes analyzing basic needs disorders of clients and families, paying attention to providing care, fostering interpersonal relationships with clients and families, and being able to provide appropriate care to clients and families who experience basic needs fulfillment disorders</i> ).
	2	PSYC501	Keperawatan Jiwa / Mental Nursing	3	170 menit	16	136	Ruang Rawat RSJ V.L. Ratumbuang Manado SULUT (Mental Hospital Inpatient Room, V.L. Ratumbuang Manado, North Sulawesi)	Praktik profesi keperawatan kesehatan jiwa merupakan tahap program yang menghantarkan mahasiswa ketika adaptasi profesi untuk menerima pendelegasian kewenangan secara bertahap dalam melakukan asuhan keperawatan jiwa yang diberikan kepada individu, keluarga dan masyarakat baik yang bersifat preventif, promotif, kuratif dan rehabilitatif serta memberikan pendidikan kesehatan, menjalankan fungsi advokasi pada klien, membuat keputusan legal dan etik serta menggunakan hasil penelitian terkini yang berkaitan dengan keperawatan jiwa. Praktik profesi keperawatan kesehatan jiwa berfokus pada penerapan asuhan keperawatan pada klien dengan masalah kesehatan jiwa dalam konteks keluarga dan masyarakat melalui penerapan keperawatan modalitas. ( <i>The practice of the mental health nursing profession is a program stage that delivers students when adapting the profession to receive gradual delegation of authority in carrying out mental nursing care given to individuals, families and communities both preventive, promotive, curative and rehabilitative as well as providing health education, carrying out functions advocating for clients, making legal and ethical decisions and using the latest research results related to mental care. The practice of the mental health nursing profession focuses on the application of nursing care to clients with mental health problems in the context of family and community through the application of modality nursing</i> ).
	3	GERP501	Keperawatan Gerontik / gerontic nursing	2	170 menit	16	90.66666667	Ruang Rawat Inap Gerontik RSUP R. D. Kandou Manado SULUT (Gerontic Inpatient Room, R. D. Kandou Provincial General Hospital Manado, North Sulawesi)	Mata ajar Keperawatan Gerontik merupakan mata ajar praktik di Program Profesi Ners pada bidang keperawatan klien usia lanjut. Titik berat mata ajar praktik keperawatan medikal bedah adalah mengembangkan kemampuan mahasiswa untuk berfikir kritis, analitis, logis, dan etis dalam aplikasi praktik klinis keperawatan dengan mengintegrasikan pemahaman berbagai konsep dasar asuhan keperawatan klien usia lanjut yang mengalami masalah kesehatan secara bio-psiko-sosio-spiritual. Asuhan keperawatan yang diberikan meliputi keseluruhan proses keperawatan serta berbagai kemampuan melakukan tindakan keperawatan mandiri maupun kolaboratif. ( <i>The Gerontic Nursing course is a practical course in the Nurse Profession Program in the nursing field of elderly clients. The emphasis of medical-surgical nursing practice is to develop students' ability to think critically, analytically, logically, and ethically in the application of clinical nursing practice by integrating an understanding of various basic concepts of nursing care for elderly clients who experience health problems in a bio-psycho-socio-spiritual manner. The nursing care provided covers the entire nursing process as well as various abilities to perform independent and collaborative nursing actions</i> ).

4	MSNG501	Keperawatan Medikal Bedah I / Medical Surgical Nursing I	8	170 menit	16	362.6666667	Ruang Rawat Inap Medikal - Bedah RSUP R. D. Kandou Manado SULUT (Inpatient Medical - Surgery Room, R. D. Kandou Provincial General Hospital Manado, North Sulawesi)	Mata ajar Keperawatan Medikal Bedah I merupakan mata ajar praktik di Program Profesi Ners pada bidang Medikal Bedah. Titik berat mata ajar praktik keperawatan medikal bedah adalah mengembangkan kemampuan mahasiswa untuk berfikir kritis, analitis, logis, dan etis dalam aplikasi praktik klinis keperawatan dengan mengintegrasikan pemahaman berbagai konsep dasar asuhan keperawatan orang dewasa yang mengalami gangguan di berbagai sistem pada tubuh manusia (kardiovaskular, respirasi, neurologi, gastrointestinal, endokrin dan penyakit menular, genito urinari dan muskulo skeletal, serta integumen dan persepsi-sensori). Asuhan keperawatan yang diberikan meliputi keseluruhan proses keperawatan serta berbagai kemampuan melakukan tindakan keperawatan mandiri maupun kolaboratif. <i>(The Medical Surgical Nursing course I is a practical subject in the Nurse Profession Program in the field of Medical Surgery. The emphasis of medical-surgical nursing practice is to develop students' ability to think critically, analytically, logically, and ethically in the application of clinical nursing practice by integrating the understanding of various basic concepts of nursing care for adults who experience disorders in various systems in the human body (cardiovascular, respiratory, respiratory, neurology, gastrointestinal, endocrine and infectious diseases, genito-urinary and musculoskeletal, and integumentary and sensory-perception). The nursing care provided covers the entire nursing process as well as various abilities to perform independent and collaborative nursing actions ).</i>
5	MSNG502	Keperawatan Medikal Bedah II (Peminatan Cardiovascular; Musculoskeletal; Neurologi; Genitourinari) / Medical Surgical Nursing II (Cardiovascular; Musculoskeletal; Neurology; Genitourinary)	2	170 menit	16	90.66666667	Ruang Rawat Inap Medikal - Bedah RSUP R. D. Kandou Manado SULUT (Inpatient Medical - Surgery Room, R. D. Kandou Provincial General Hospital Manado, North Sulawesi)	Mata ajar Keperawatan Medikal Bedah II neurologi merupakan mata ajar praktik lanjutan dari Praktik Profesi Keperawatan Medikal Bedah I di Program Profesi Ners pada bidang Medikal Bedah, dalam hal ini berfokus pada sistem Cardiovascular, Musculoskeletal, Neurologi, Genitourinari. Titik berat mata ajar Praktik Keperawatan Medikal Bedah II neurologi adalah mengembangkan kemampuan mahasiswa dalam melakukan asuhan keperawatan yang komprehensif dengan menerapkan hasil-hasil penelitian dan referensi yang <i>up to date</i> . <i>(The Medical Surgical Nursing II course in neurology is an advanced practice course from the Medical Surgical Nursing Profession I at the Nurse Profession Program in the Medical Surgery field, in this case focusing on the Cardiovascular, Musculoskeletal, Neurology, and Genitourinary systems. The emphasis of the Neurology Medical Surgical Nursing Practice II course is to develop students' abilities in performing comprehensive nursing care by applying research results and up-to-date references ).</i>
1	MATP501	Keperawatan Maternitas / Maternity Nursing	3	170 menit	16	136	Ruang Rawat Inap Anak RSUP R. D. Kandou Manado SULUT (Pediatric Inpatient Room, R. D. Kandou Provincial General Hospital Manado, North Sulawesi)	Praktik profesi keperawatan maternitas merupakan program yang menghantarkan mahasiswa dalam adaptasi profesi untuk menerima pendelegasian kewenangan secara bertahap dalam melakukan asuhan keperawatan profesional, memberikan pendidikan kesehatan, menjalankan fungsi advokasi pada klien, membuat keputusan legal dan etik serta menggunakan hasil penelitian terkini yang berkaitan dengan keperawatan maternitas dalam konteks keluarga.
